PROJECTS

ASOS website clone

🐙 https://github.com/Sagar1079/asos_project

ASOS is an eCommerce retailer famous worldwide for its latest fashion and trends in menswear and womenswear and we made a clone of its website.

Features

☛ End-to-End flow of purchasing products from the website.

☛ Different sorting features to sort products.

Tech-Stack

HTML   CSS   JAVASCRIPT

Area of Responsibility

☛ Was resposible for creating login page, signup page and and provided functionality using localstorage.

☛ Created home page of the website.

Mail_Chimp website clone

🐙 https://github.com/PRA3EEK/ethereal-mask-9914

Mailchimp is a marketing automation platform and email marketing service and we made a clone a clone of its online platform.

Features

☛ Created most of the static pages of the website keeping all the UI same as the original website.

Tech-Stack

HTML   CSS   JAVASCRIPT

Area of Responsibility

☛ Was resposible for creating login page, signup page and and provided functionality using localstorage.

☛ Created navbar using advanced animations and javascript.
